

# BIPV Glass Classification

- Crystalline Silicon BIPV

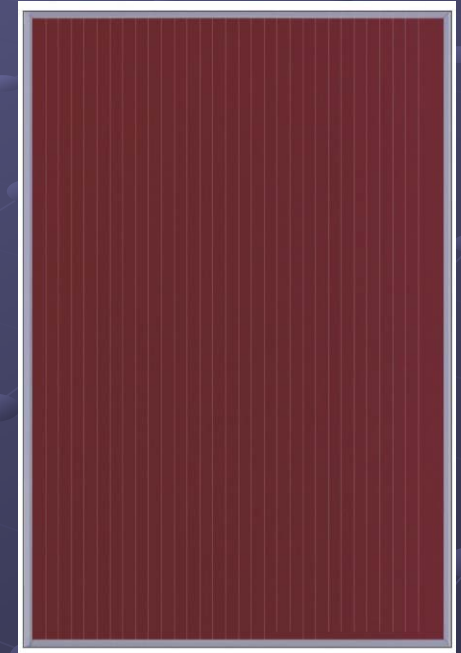

- Thin Film BIPV

# Thin-Film PV Module

## Compare to C-si Module:

- Lower cost
- Generate electricity even in rainy and cloudy days. In weak light condition, increase more than 30% generating capacity than c-si module
- Better high temperature performance
- No raw material limitation
- Induce reflected light

# Thin-Film BIPV Glass

## Usage

- Structural Curtain Wall
- Skylight
- Sunshading Board, etc
